plotter. Tests of screen
printing, glittering.

Prototype packaging

With our highly experienced team and advanced technology, we offer premium quality product packaging mockups, comps, and prototypes at a price that will not break the bank for use as sales samples, or for buyer presentations, planograms, TV or print advertising, and more! Our custom mock packaging comps are handmade according to your provided specifications and can be produced in a wide variety of substrates and finishes. Flaps & Tabs works daily to maintain the creative evolution of its product line in order to keep pace with

demands of the ever-changing packaging world. We understand the critical importance of making your product be the one that catches the consumer's attention! The sampling of packaging formats below illustrates just some of Virtual's capabilities.

- Bags and Flow Wraps
- Boxes & Carton board
- Labeling Design

About us

We work with the combined passion of creating design solutions to make people's lives richer, and the commercial understanding to make them incredibly successful.

We work on a diverse range of projects, and it is this diversity that not only keeps our team fresh, excited and engaged but also informs and enhances creativity through the transfer of knowledge and skills between disciplines. Whether we are designing a single product, complete ranges, experiences, brands,

environments or strategies, our blend of research, insight and design creates thoughtful solutions that succeed in their markets.

Barber and Osgerby approach is characterized by its emphasis on experimentation and innovation and an exploratory attitude to materiality and color. From these areas of focus emerge solutions that reflect the close relationship of their work with industrial processes and new technologies.
